

D7611T

Conference Lifting Microphone

Description

D7611T Conference Lifting Microphone is an independent lifting microphone embedded in the table, which adopts customized lifting chassis and imported famous silent synchronous motor for more outstanding performance, and supports automatic door opening and closing for dustproof function, automatic straightening function when lowering the microphone, and one-key lifting, as well as centralized lifting through the serial port.

Features

- Installation Method: Embedded electric lifting installation
- Color: Silver
- Panel: 189*70*3MM
- Chassis: 175*59*720MM
- Power Supply: AC220/50HZ
- Microphone Sensor Type: Condenser
- Directivity: Supercardioid unidirectional
- Frequency Response: 50Hz-17000Hz
- Sensitivity: -45±2dB@1KHz
- Power: 25W
- Weight: 4KG

Model	D7611T
Installation Method	Embedded electric lifting installation
Color	Silver
Panel	189*70*3MM
Chassis	175*59*720MM
Power Supply	AC220/50HZ
Microphone Sensor Type	Condenser
Directivity	Supercardioid unidirectional
Frequency Response	50Hz-17000Hz
Sensitivity	-45±2dB@1KHz
Power	25W
Weight	4KG

System Architecture

DSPPA Intelligent Paperless Conference System Topology
