

D7651W

Double-Sided Tricolor E-Ink Screen Meeting Nameplate

Description

With low power consumption, the device requires charging only once every few months under regular use. It supports over-the-air wake-up and offers fast refresh rates, delivering results within seconds. Featuring a dot-matrix e-paper screen, it provides a nearly 180° viewing angle for a natural and paper-like display effect. Simple to install and quick to deploy, it operates on battery power, eliminating the need for wiring. The dual-sided display is sleek, minimalist, and visually appealing. Designed for global deployment, it is ready for use without installation. Additionally, it has an intuitive interface that is easy to get started quickly without prior learning.

Features

- Enjoy months of use with ultra-low power consumption.
- 7.5" tricolor e-ink screen with nearly 180° viewing angle for clear visibility.
- Support over-the-air wake-up and fast refresh rates for immediate display.
- Simplify setup with wireless connectivity and battery operation.
- Feature the sleek dual-sided design with e-ink screens.
